Quality/Hygiene This list is regularly processed to remove duplicates, undeliverables, and do-not-mail records. First, U.S. Postal Service C.A.S.S.-certified (Coding Accuracy Support System) software is used to check each address against the U.S. Postal Service national database. Incorrect street names and missing or incorrect states and ZIP+4 codes are corrected. Once the address has been standardized and the ZIP+4 code applied, an attempt is made to match the address against the N.C.O.A. (National Change-of-Address) File, which contains approximately 115 million records or 36 months of permanent address changes. Address change information is derived from the PS Form 3575, *Change-of-Address Order*, filed by relocating postal customers. Finally, the list is run against the DMA Mail Preference Service consumer file to remove do-not-mail records. The list is supplied in ZIP+4 format.

Update Frequency Monthly on the last business day of the month; approx. 5,000 new records per month.
