Convergence IT Professionals

Count 114,738 records; 83,345 male, 12,220 female, 19,173 unknown gender; 100% 3-line residential addresses.

Buyer Profile This multi-sourced list consists of IT (information technology) professionals at their residential addresses. These buyers have purchased high-end programming tools for C/C++ and Java, server hardware and software including web servers, proxy servers, e-mail servers, database servers, and e-commerce servers. They are direct response buyers of sophisticated computer, communications, and other Internet-based products and services. At work, they have titles like software architect, database manager, e-commerce manager, network engineer, software test engineer, etc. These busy, tech-minded individuals have purchased via direct response display advertising, direct mail, and Internet e-commerce. Convergence IT Professionals are the architects of the new economy, e-commerce leaders by day and affluent, connected consumers by night.

List Applications — Technology IT recruitment, computer, Internet, and communications trade publications and related web sites, Linux OS tools, desktop and mobile computer hardware and software, broadband Internet (cable, DSL, wireless, satellite), PDAs (personal digital assistants), personal web hosting, ASPs (application service providers), instant messaging, digital multimedia hardware, software, and services.

Shipping/Availability Approved orders are shipped the same day we receive them, usually within one hour of receipt. Alternatively, we offer free overnight shipping on CD-ROM via Federal Express.

Quality/Hygiene This list is regularly processed to remove duplicates, undeliverables, and do-not-mail records. First, U.S. Postal Service C.A.S.S.-certified (Coding Accuracy Support System) software is used to check each address against the U.S. Postal Service national database. Incorrect street names and missing or incorrect states and ZIP+4 codes are corrected. Once the address has been standardized and the ZIP+4 code applied, an attempt is made to match the address against the N.C.O.A. (National Change-of-Address) File, which contains approximately 115 million records or 36 months of permanent address changes. Address change information is derived from the PS Form 3575, *Change-of-Address Order*, filed by relocating postal customers. Finally, the list is run against the DMA Mail Preference Service consumer file to remove do-not-mail records. The list is supplied in ZIP+4 format.

Update Frequency Monthly on the last business day of the month; approx. 5,000 new records per month.
