Convergence Personal Electronics Buyers

Count 1,441,303 records; 709,061 male, 626,285 female, 105,957 unknown gender; 100% 3-line residential addresses.

Buyer Profile This multi-sourced list consists of direct response buyers of personal electronics. They have purchased cell phones, pagers and wireless messaging devices, radar detectors, personal digital assistants (Palm and Microsoft Pocket PC), MP3, cassette, and CD audio players, fitness and health monitors, and other high-tech gadgets and gizmos in the \$75-\$500 price range. These tech-savvy consumers have purchased via direct response display advertising, direct mail, and Internet e-commerce. They rely on personal electronics to manage their personal and business communications, scheduling, fitness, and entertainment needs.

List Applications— Technology Cellular/wireless phones and services including wireless e-mail and messaging, MP3 players, portable CD and DVD players, GPS receivers, radar detectors, fitness/health monitors, home electronics including HDTV, satellite receivers, home theater components, home automation devices, desktop and mobile computer hardware and software, broadband Internet (cable, DSL, wireless, satellite), PDAs (personal digital assistants), personal web hosting, ASPs (application service providers), instant messaging, digital multimedia hardware, software, and services, gaming consoles and accessories.

Format Comma-delimited ASCII file, sorted by Zip+4 code. Fixed-length ASCII format available upon request.

Shipping/Availability Approved orders are shipped the same day we receive them, usually within one hour of receipt. Alternatively, we offer free overnight shipping on CD-ROM via Federal Express.

Quality/Hygiene This list is regularly processed to remove duplicates, undeliverables, and do-not-mail records. First, U.S. Postal Service C.A.S.S.-certified (Coding Accuracy Support System) software is used to check each address against the U.S. Postal Service national database. Incorrect street names and missing or incorrect states and ZIP+4 codes are corrected. Once the address has been standardized and the ZIP+4 code applied, an attempt is made to match the address against the N.C.O.A. (National Change-of-Address) File, which contains approximately 115 million records or 36 months of permanent address changes. Address change information is derived from the PS Form 3575, *Change-of-Address Order*, filed by relocating postal customers. Finally, the list is run against the DMA Mail Preference Service consumer file to remove do-not-mail records. The list is supplied in ZIP+4 format.

Update Frequency Monthly on the last business day of the month; approx. 45,000 new records per month.
