Convergence Windows XP-Ready PC Owners Canada

Count 659,487 records; 302,439 male, 39,610 female 317,438 unknown gender; 100% 3-line residential addresses.

Buyer Profile This multi-sourced list consists of Canadian direct response buyers of computer, communications, and other Internet-based products and services for the Microsoft Windows 95, 98, and Millenium (ME) environments. In the past three years, these legacy PC owners have demonstrated their commitment to the personal computing lifestyle by purchasing productivity software, personal finance/investment software and services, desktop and web publishing products and services, digital media software, educational and self-improvement software, and gaming software. Their average investment in personal computing exceeds \$2000.

Shipping/Availability Approved orders are shipped the same day we receive them, usually within one hour of receipt. Alternatively, we offer free overnight shipping on CD-ROM via Federal Express.

Quality/Hygiene This list is regularly processed to remove duplicates, undeliverables, and do-not-mail records. First, U.S. Postal Service C.A.S.S.-certified (Coding Accuracy Support System) software is used to check each address against the U.S. Postal Service national database. Incorrect street names and missing or incorrect states and ZIP+4 codes are corrected. Once the address has been standardized and the ZIP+4 code applied, an attempt is made to match the address against the N.C.O.A. (National Change-of-Address) File, which contains approximately 115 million records or 36 months of permanent address changes. Address change information is derived from the PS Form 3575, *Change-of-Address Order*, filed by relocating postal customers. Finally, the list is run against the DMA Mail Preference Service consumer file to remove do-not-mail records. The list is supplied in ZIP+4 format.

Update Frequency Monthly on the last business day of the month; approx. 75,000 new records per month.
